SUMMARY

Software Engineering Student with commercial experience in backend development, relational database design (MySQL), and enterprise web applications. Hands-on experience developing core backend modules for business systems, including ERP, CRM, procurement, and field maintenance workflows. Experienced in RESTful API development, User Acceptance Testing (UAT), and full Software Development Life Cycle (SDLC) processes. Seeking a 16-week Software Engineering Internship from 18 January 2027 to 7 May 2027.

EDUCATION

Asia Pacific University of Technology & Innovation (APU), Malaysia

Bachelor of Science (Hons) in Software Engineering — *Expected: 2028*

- GPA: 3.82/4.0 (Semester 1) — *2026 – Present*

Diploma in Information and Communication Technology (Software Engineering) — *2023 – 2025*

- GPA: 3.68/4.0

WORK EXPERIENCE

LW TECH SDN. BHD. | Kuala Lumpur, Malaysia

Part-Time Software Developer — *03/2026 – Present*

- **Project: Elevators and Escalator System** — *04/2026 – Present*
  - Engineered backend modules to manage customer data, site locations, elevator assets, and maintenance jobs.
  - Developed automated technician dispatch and scheduling logic to optimize field team resource allocation and service coverage.
  - Digitised manual, paper-based inspection reporting into a centralized system, enabling technicians to submit reports and improving record traceability for audit and review purposes.

Software Developer Intern — *09/2025 – 02/2026*

- **Project: Construction Trading System** — *11/2025 – 07/2026*
  - Built backend procurement workflows handling end-to-end purchasing operations, including vendor quotations, sales order processing, goods receipt notes (GRN), and inventory movement tracking.
  - Developed a multi-vendor competitive bidding module enabling structured price comparisons vendor evaluation for project tender line items.
  - Executed User Acceptance Testing (UAT), documented test findings, and assisted in user training sessions to ensure smooth client adoption.
- **Project: Xameon Internal System | LW TECH SDN. BHD.** — *09/2025 – 11/2025*
  - Designed structured relational MySQL database schemas, establishing foreign key constraints, table relationships, and optimized queries for core business transactions.
  - Developed and documented RESTful JSON APIs to power ERP/CRM modules, including quotation generation, sales invoicing, dispatch tracking, project task management, and customer support ticketing.

CERTIFICATIONS

Cisco CCNA: Introduction to Networks – Cisco Networking Academy

Google UX Design Professional Certificate – Coursera

Scrum Fundamentals Certified – SCRUMstudy

Student Committee Member FYP Showcase 2026

Gemini Academy Workshop 2026 – Google for Education

Google Certified Educator Level 1 – Google for Education (Exam-Certified)

SKILLS

Programming: PHP, Java, Python, SQL, JavaScript, HTML5/CSS3, R, C++ (Beginner), Flutter (Beginner)

Backend & Databases: RESTful APIs, JSON, MySQL, Microsoft SQL Server, HeidiSQL, Relational Schema Design

Tools & Methodologies: Git, GitHub, Apache NetBeans, Joget Workflow, SDLC, User Acceptance Testing (UAT), Agile / Scrum

Design & Documentation: UML Diagramming, User Flows, Prototyping, Figma, Wireframing

Languages: English, Chinese, Malay
